SUMMARY

Backend developer with a strong grounding in PHP, Laravel, and MySQL relational architecture. I build systems by starting with normalized database schemas, clean constraints, and logic that holds up once real people start using it. I've shipped a full-stack attendance platform currently running in a university department, and I'm extending that same foundation into TypeScript, React, Docker, and Firebase to work comfortably across the full stack.

PROJECTS

Smart Attendance System  , Academic Project

06/2026

Full-stack attendance platform replacing paper registers and manual exam-eligibility tracking. Normalized MySQL schema, role-based auth (lecturer/admin/student), automated attendance-percentage engine with PDF/CSV export.*PHP · MySQL (3NF) · JavaScript*

Àdùkẹ Restaurant Platform 

08/2026

QR-based dine-in ordering system. Table-specific QR sessions routing orders to the kitchen, role-based dashboards (waitstaff/kitchen/cashier/manager), server-side cart validation against price tampering.*PHP (MVC) · MySQL · JavaScript*

AuraCV Resume Builder 

Client-side resume builder with zero server storage. Real-time reactive preview, localStorage state, ATS-compliant single-column export, offline-first PWA.*JavaScript · PWA*

EXPERIENCE

Backend Developer Intern (SIWES), Olak Tech

2025 – 2025

- Collaborated on backend features and database structures in PHP and MySQL. Built and debugged REST API endpoints, handled schema migrations, and optimized queries for reliable data handling across client systems.

Campus Ambassador Lead, Cowrywise

11/2025 – Present

- Directed student outreach and onboarding initiatives, led community workshops on savings and digital wealth management, and served as liaison between student users and the product growth team.

Partnerships Contributor, Crypto Dungeon

11/2024 – 11/2025
Remote

- Moderated comments, DMs, and community activity across Discord and X, and helped coordinate AMAs and partner campaigns.
- Tracked engagement numbers closely to time content drops around promotions.

EDUCATION

ND in Computer science, Moshood Abiola Polytechnic

2023 – 2025

ND/HND

- Core Coursework: Database Management Systems (DBMS), Systems Analysis & Design, Web Development, and Digital Marketing Logic.

CERTIFICATES

- C1 Advanced English

CORE SKILLS

PHP & Laravel

RESTful API design, MVC architecture, OOP

TypeScript & React

component-based frontend development

MySQL

3NF schema design, ACID transactions, indexing, query optimization

Docker

containerized deployment

LANGUAGES

- English
- Yoruba
