SUMMARY

Organized Operations Specialist and Digital Strategist with experience coordinating community logistics, managing brand partnerships, and executing data-driven social media growth campaigns. Highly adept at administrative workflow automation, digital asset coordination, and cross-functional team scheduling to optimize business performance.

EXPERIENCE

2025 – 2025
Lagos, Nigeria

Olak Tech, Backend Developer Intern (SIWES)

- Coordinated technical administrative logging, systems analysis documentation, and workflow tracking using version control tools.
- Structured data schemas and organized secure information storage systems to support clean business reporting and technical updates.
- Collaborated with engineering teams to map out technical requirements and maintain internal operational documentation.

11/2024 – 11/2025
Remote

Crypto Dungeon, Partnerships Contributor

- Managed multi-channel community operations and digital asset moderation on Discord and X (Twitter) to maintain high engagement and user retention.
- Coordinated strategic brand partnerships and logistics with third-party digital platforms (including Create With Me AI) to expand ecosystem reach.
- Monitored organic audience performance metrics to align content launch timelines with promotional objectives.

11/2025 – Present
Remote

Cowrywise, Campus Ambassador Lead

- Coordinated on-campus marketing logistics, financial literacy events, and promotional campaigns for a prominent financial platform.
- Supervised a local team of student representatives, tracking deliverables and organizing resource distribution across campus.

11/2024 – 08/2025
Remote

oSHAMO, Early Rollout Strategist

Devised and executed organic digital rollout plans, tracking content deliverables and launch schedules across social media channels to maximize promotional reach and audience engagement.

EDUCATION

2023 – 2025
Ogun State, Nigeria

ND/HND • ND in Computer science, Moshood Abiola Polytechnic

- **Core Coursework:** Database Management Systems (DBMS), Systems Analysis & Design, Web Development, and Digital Marketing Logic
- **Academic Systems Project:** Designed and built a full-stack QR-code attendance tracking system using PHP and MySQL to automate student logging and successfully eliminate manual administrative paperwork for faculty.
-

SKILLS

Technical

- **PHP & Laravel Frameworks:** Server-side application development, secure API architectures, and scalable web engineering.
- **MySQL Database Architecture:** Relational schema optimization, database normalization, complex query building, and data integrity constraints.
- **Systems Development & Tools:** Git/GitHub version control, Progressive Web Apps (PWA), and automated script testing workflows.

Web3/Digital

- **Digital Rollout Strategy:** Organic promotional campaigns, community tracking metrics, launch schedule coordination, and audience retention modeling.
- **Operations & Community Management:** Multi-channel Discord/X moderation, stakeholder communication, onboarding logistics, and data entry administration.
- **Professional Communications:** Technical writing, document management, project workflow organization, and verified C1 Advanced English proficiency.

English

Professional Fluency (C1 Advanced Certified)

CERTIFICATIONS

- Backend Engineering & Database Architecture 2025
- Social Media Marketing Certification, HubSpot Academy
- C1 Advanced English Certification (EF SET) — 2026
- Google Project Management Professional Certificate, Google
- Google Digital Marketing & E-commerce Professional Certificate, Google
- Asana Project Management Certificate, Asana

AWARDS

2025

Best Content Strategy Award, Moshood Abiola Polytechnic

- Awarded for developing innovative digital rollout plans that significantly increased community retention and organic growth.

2025

Cowrywise Campus Ambassador, Cowriswe

- Selected for a leadership role to drive financial literacy and digital savings adoption within the Moshood Abiola Polytechnic community.

2025

Web3 Contributor of the Year, Moshood Abiola Polytechnic

- Recognized for outstanding technical and community contributions within decentralized ecosystems.

☆ VOLUNTEER

Early Rollout Strategist, oSHAMO

Open Source Contributor, GitHub

- Maintain and contribute to various backend repositories focusing on PHP and SQL integrity.

📁 PROJECTS

2026 – 2026

BlacRate Pro, github.com/Blaconchain/blacrate-pro

- Developed a Progressive Web App (PWA) for OTC traders to calculate real-time Crypto-to-Naira rates.
- Implemented offline-first functionality to ensure tool accessibility regardless of network conditions.

2026 – 2026

Receipt Pro, github.com/Blaconchain/receipt-pro

- Architected a backend system for digital receipt management focusing on SQL data integrity.
- Designed relational database schemas to ensure secure and efficient transaction logging.

2025 – 2025

Smart Attendance System, Academic Project

- Built a QR-code-based attendance tracker for MAPOLY to automate student logging.
- Developed the full system using PHP and MySQL, eliminating manual paperwork for lecturers.
