SUMMARY

Backend developer with a strong grounding in PHP, Laravel, and MySQL relational architecture. I build systems by starting with normalized database schemas, clean constraints, and logic that holds up once real people start using it. I've shipped a full-stack attendance platform currently running in a university department, and I'm extending that same foundation into TypeScript, React, Docker, and Firebase to work comfortably across the full stack.

CORE SKILLS

- PHP & Laravel — RESTful API design, MVC architecture, OOP
- MySQL — 3NF schema design, ACID transactions, indexing, query optimization
- TypeScript & React — component-based frontend development
- Docker — containerized deployment
- Git/GitHub — version control, collaborative workflows

PROJECTS

Smart Attendance System — Academic Project

06/2025 – 09/2025

- Full-stack attendance platform replacing paper registers and manual exam-eligibility tracking.
- Normalized MySQL schema, role-based auth (lecturer/admin/student), automated attendance-percentage engine with PDF/CSV export.

PHP · MySQL (3NF) · JavaScript

Àdùkẹ Restaurant Platform — Personal Project

2026

- QR-based dine-in ordering system. Table-specific QR sessions routing orders to the kitchen.
- Role-based dashboards (waitstaff/kitchen/cashier/manager), server-side cart validation against price tampering.

PHP (MVC) · MySQL · JavaScript

AuraCV Resume Builder — Personal Project

2026

- Client-side resume builder with zero server storage — real-time reactive preview, localStorage state.
- ATS-compliant single-column export, offline-first PWA.

JavaScript · PWA

EXPERIENCE

Backend Developer Intern (SIWES) — Olak Tech

Jan 2025 – Jun 2025

- Collaborated on backend features and database structures in PHP and MySQL.
- Built and debugged REST API endpoints, handled schema migrations, and optimized queries for reliable data handling across client systems.

Campus Ambassador Lead — Cowrywise

2025 – Present

- Directed student outreach and onboarding initiatives; led community workshops on savings and digital wealth management.
- Served as liaison between student users and the product growth team.

EDUCATION

National Diploma (ND), Computer Science — Moshood Abiola Polytechnic (MAPOLY)

2023 – 2025

- Coursework: Database Management Systems (DBMS), Systems Analysis & Design, Web Development.
